

## Project Design Phase-II

### Solution Requirements (Functional & Non-functional)

Date	21/10/2022
Team ID	PNT2022TMID23375
Project Name	Project - Analytics for Hospitals' Health-Care Data
Maximum Marks	4 Marks

#### Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through website
FR-2	User Confirmation	Confirmation via Email Confirmation via Message
FR-3	Data Cleaning	We clean the data because there are many potential for data to be duplicated or incorrectly labelled when merging multiple data sources
FR-4	Reliability	Users may utilize this dashboard in an effective, efficient, and reliable manner since it is consistent and reliable for them.
FR-5	Accuracy	Dashboard accurately predicts the patient's health risks based on the length of their stay.

### Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

<b>FR No.</b>	<b>Non-Functional Requirement</b>	<b>Description</b>
NFR-1	<b>Usability</b>	In order to provide a clear understanding of the patient's Length Of Stay, this dashboard makes use of data visualisation techniques including charts and graphs.
NFR-2	<b>Security</b>	Only users who have the password can access the website. High degrees of security are provided through the use of encryption techniques to secure the database.
NFR-3	<b>Reliability</b>	Users will find this dashboard to be constant and dependable, assisting them in using it effectively, efficiently, and dependably.
NFR-4	<b>Performance</b>	The project must respond quickly to the user's actions or even if the user has to wait the waiting period must be short.
NFR-5	<b>Availability</b>	The project is independent of platforms. On practically every platform, it functions flawlessly.
NFR-6	<b>Scalability</b>	The project enables concurrent usage of the data by several people. Because adding features and improving the website is simple, it is very scalable.
